

4年生算数

～わり算の筆算1～⑧
あまりのあるわり算

3けたになってもやり方は同じ。

①
$$\begin{array}{r} \square \square \square \\ 3 \overline{) 465} \\ \square \square \square \\ \hline \square \square \\ \hline \square \square \\ \hline \square \square \end{array}$$
 ②

Diagram showing the long division of 465 by 3. The first step shows 3 dividing 465, with a quotient of $\square\square\square$ and a remainder of $\square\square$. Arrows indicate the next steps: dividing the remainder by 3 to get the next digit of the quotient, and then dividing the final remainder by 3 to get the final digit of the quotient.

③
$$4 \overline{) 792}$$

④
$$3 \overline{) 816}$$

⑤
$$8 \overline{) 936}$$

$$3 \overline{) 972}$$
